

Theme-based programmes/ working groups

- [Aid Policy and Performance](#)
The aim of the WG is to analyse the policy and performance of European governments and the European Union with regard to their policy and performance vis-à-vis developing countries.
- [Co-operation in Development and Area Studies Training](#)
The work of the Working Group on Co-operation in Training is concerned with a function that is shared by many EADI member institutes: providing training in development or area studies.
- [Environment and Development](#)
The scope of this Working Group is to explore issues of sustainable development and policy interlinkages with regard to environment and development.
- [Europe and Asia](#)
This working group deals with current and new development challenges in Europe and Asia.
- [Europe and Latin America](#)
The basic subject of the Group is the analysis of ongoing relations between Europe and Latin America, at an institutional, economic and social level, in the framework of international relations. It may also focus on specific Latin American internal issues
- [Gender and Development](#)
The group intends to establish a database of members that provides an overview of research activities and expertise and also facilitates communication and the preparation of seminars. The long-term aim is to make use of possibilities for conducting common
- [Governance and Development](#)
The Working Group encourages a comparative dimension, investigating governance reforms in different regions of the world, focusing on both developing and transition countries.
- [Industrialisation Strategies](#)
The emphasis of this Working Group has been on studying industrialization strategies of developing countries.
- [Information Management](#)
The Information Management Working Group aims to serve as a platform for reflection, discussion and action on the use and management of development information across Europe.
- [International Migration](#)
This Working Group intendeds to study issues in the setting of conflicting interests and policy contradictions, with an emphasis on the implications which international migration bears on the sending countries (via loss of labour force and inflow of remittances).
- [Knowledge, Policy and Power](#)
The group seeks to bring together those working on knowledge-policy issues across the European development research community. The aim of the group would be to contribute to contemporary debates and conduct/disseminate multi-disciplinary research on selected issues.
- [Multidimensional Poverty](#)
The objective of the working group is to contribute to contemporary debates and conduct/disseminate multi-disciplinary research on selected poverty issues.
- [Transformation in the World System - Comparative Studies of Development](#)
Technological breakthroughs and the prospects of emergence of a new "centre" and "-peripheries", the role of new technologies in the configuration of the world system, the issues of human and social capital and their significance for changes within world structure are some of the topics of the working

group.

- [Transnational Corporations and Development](#)

The ambition of the working group is to contribute to the debate on TNCs and development by conducting and disseminating interdisciplinary and high quality research on a selected number of topics related to this theme.

- [Urban Governance](#)

The scope of this Working Group is to explore urban governance and insecurity implications of increasing polarization in urban livelihoods.

EADI Programmes are programmes of the association. See <http://www.eadi.org>
